Stream Habitat Work Party

Saturday, October 13, 2018

A few TRAA members cleared a number of fallen trees and other blockages on October 13th. Dan Shinkelshoek made a video of the proceedings and it's worth a look so

Annual TRAA Paddle & Fish

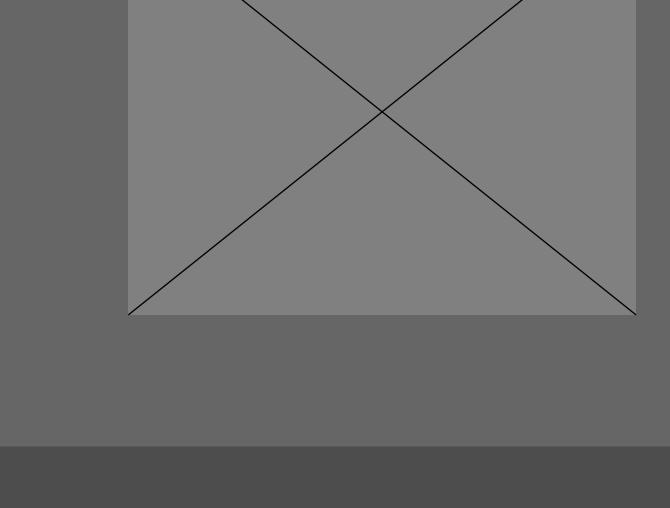

This year we be mixed it up a bit by having the Annual TRAA Paddle & Fish on Sharon Creek Reservoir. A thunderstorm threatened but only gave us a few minutes of rain to cool us

off. Fish targeted were largemouth bass, crappie and other panfish as well as some bruiser carp.

Many bass were caught with some crappies mixed in to make it interesting. Paul Holmes ended up with the largest fish, a nice smallmouth bass.

grill and the cooking expertise - Thanks Rick!

An informal BBQ lunch followed with Rick Ornato supplying the

Stream Habitat Work Party

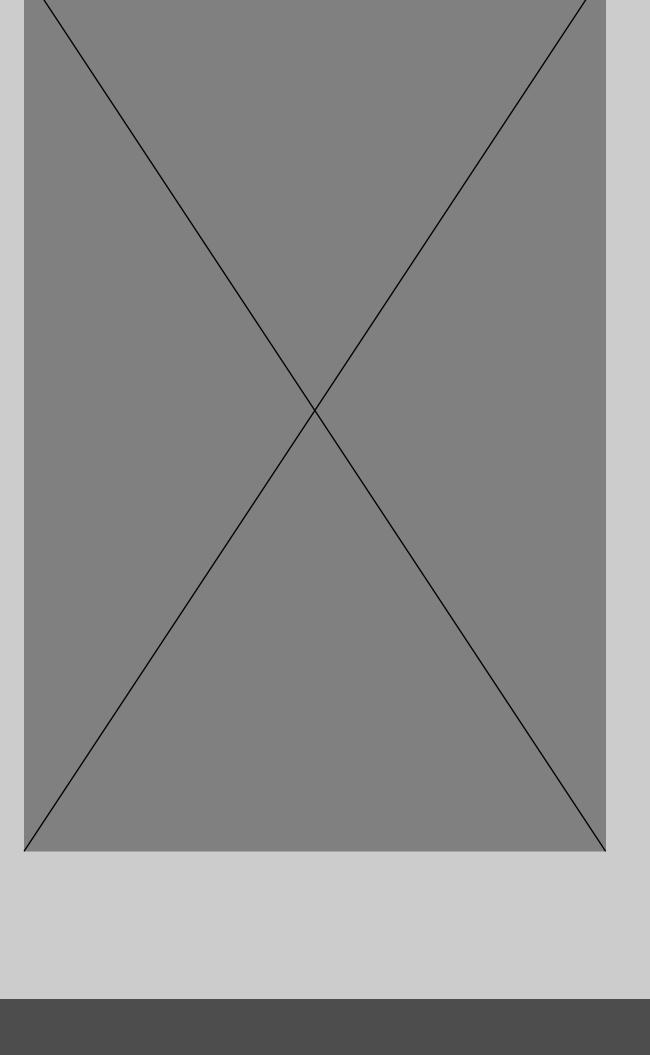

We were very excited to have a group from the MNRF's Stewardship Youth

further bank side damage and erosion.

groups of 16 or 17 year-olds an opportunity to spend 8 weeks working outdoors on natural resource management projects in their own community. They worked on clearing a section of Komoka Creek upstream of the TRAA trout hatchery. A major tree had fallen and a lot of the bank went with it. This created a blockage and was diverting the stream, increasing the likelihood of

Rangers Program to do some work on Komoka Creek. This program gives

We were also fairly certain that this was a barrier to migratory and resident fish passage.

dewetering and Rob Huber for taking the time to help out with the this event.

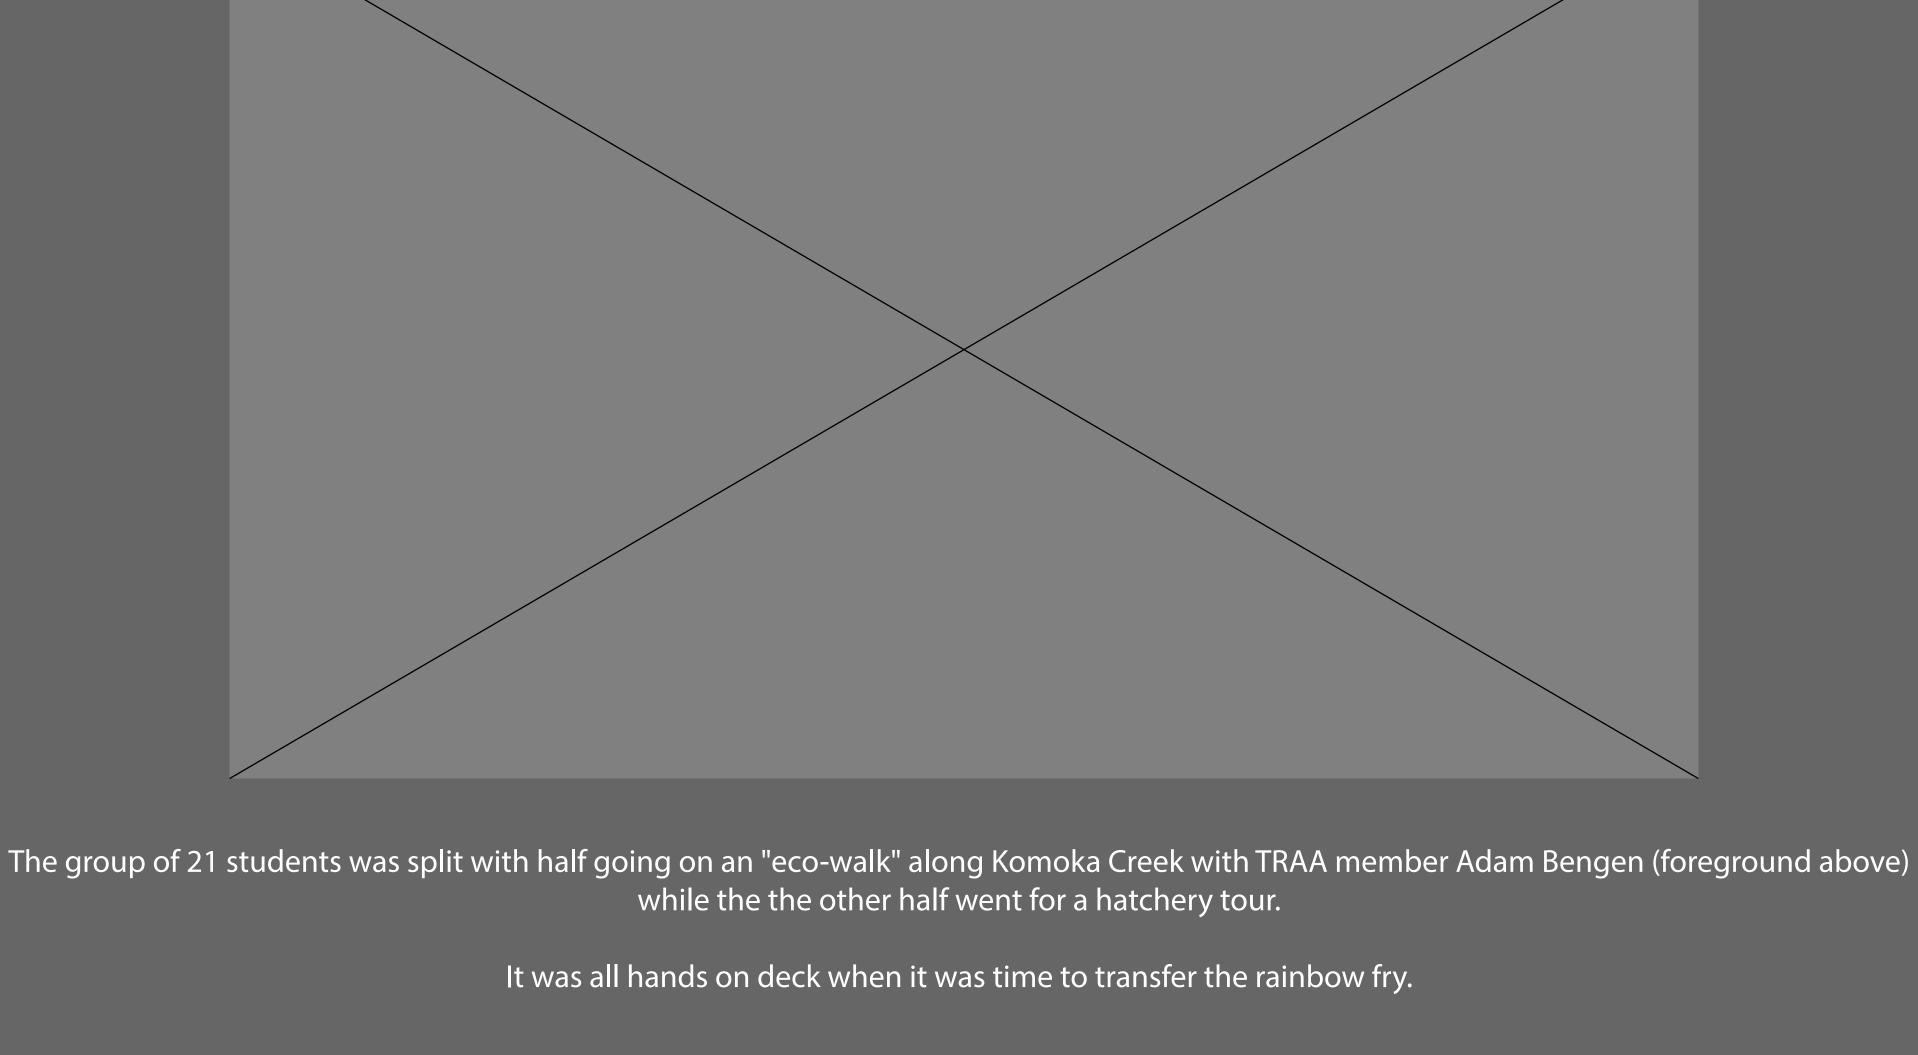

The rainbow trout fry were released into Dingman Creek with the help of a

Rainbow Trout Release

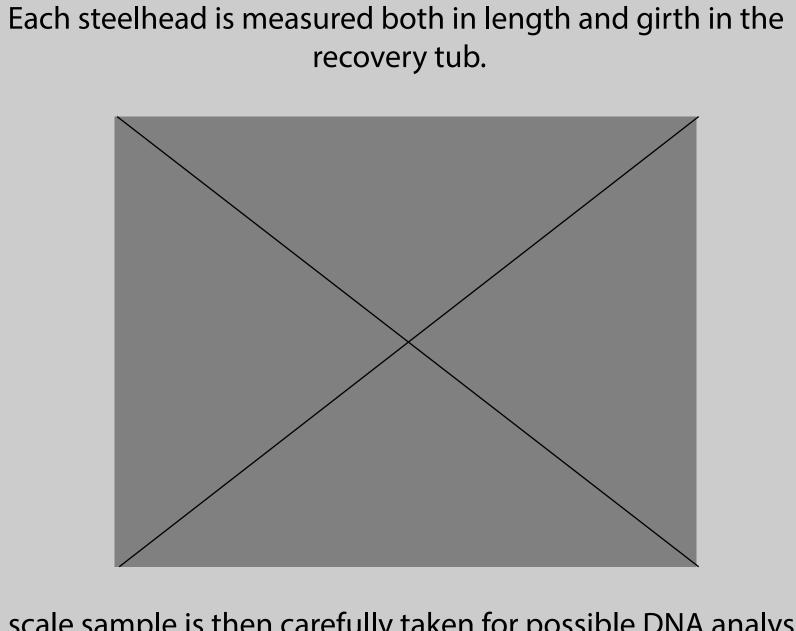

This program for steelhead (migratory rainbow trout) on Komoka Creek has been extended to continue and will begin again in the spring of 2016. Thanks to all who helped out this year and a special shout out to John and Jason of the UTRCA Here are some shots of one of our outings this season:

Program for this spring.

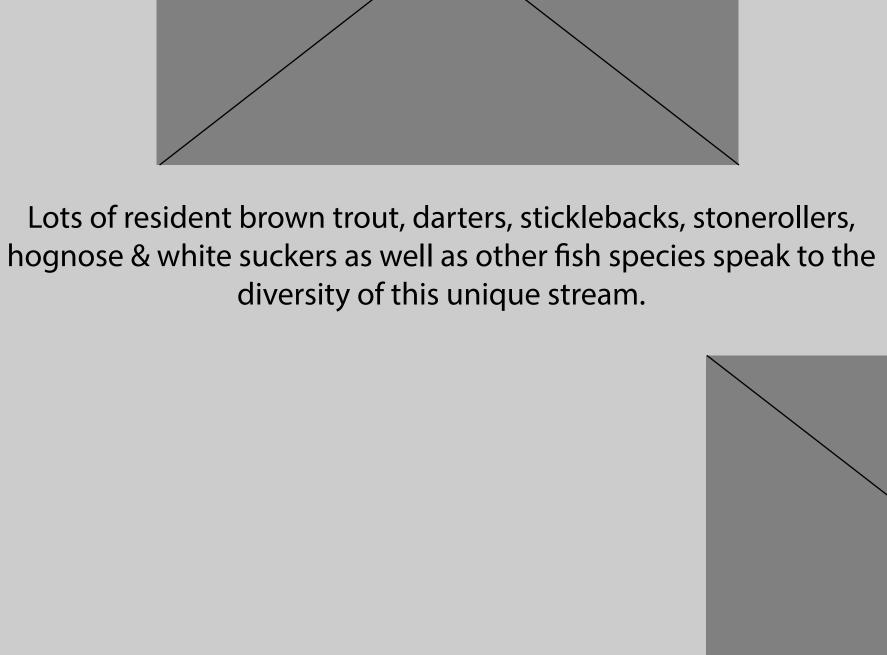

spotted during recent stream walks.

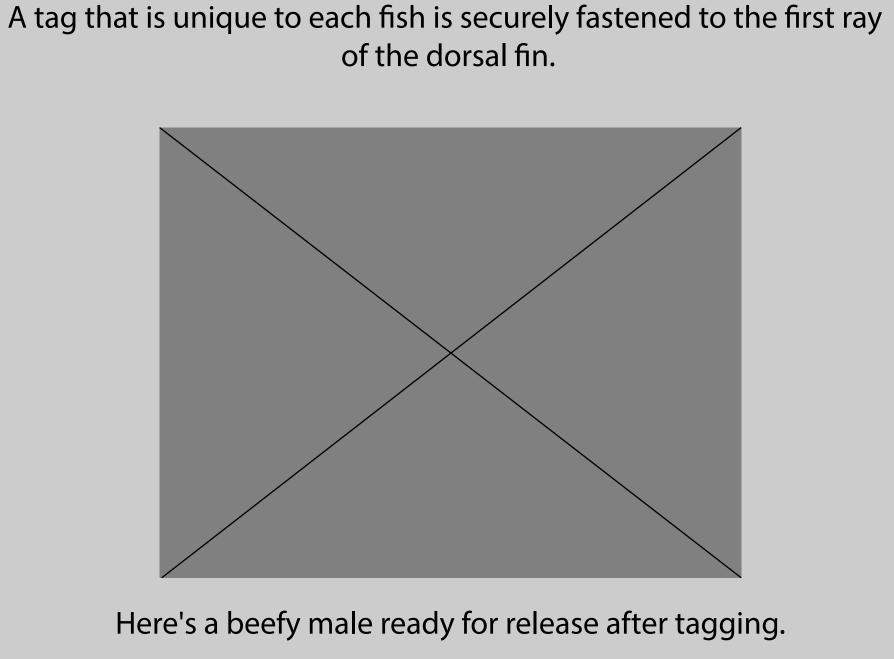

TRAA members and personnel from the Upper Thames River Conservation Authority (UTRCA) have finished up the Salmonid Tagging and Monitoring

It looks like all the migratory Rainbow trout have visited Komoka Creek, done their thing and have dropped back down as there appears to be none

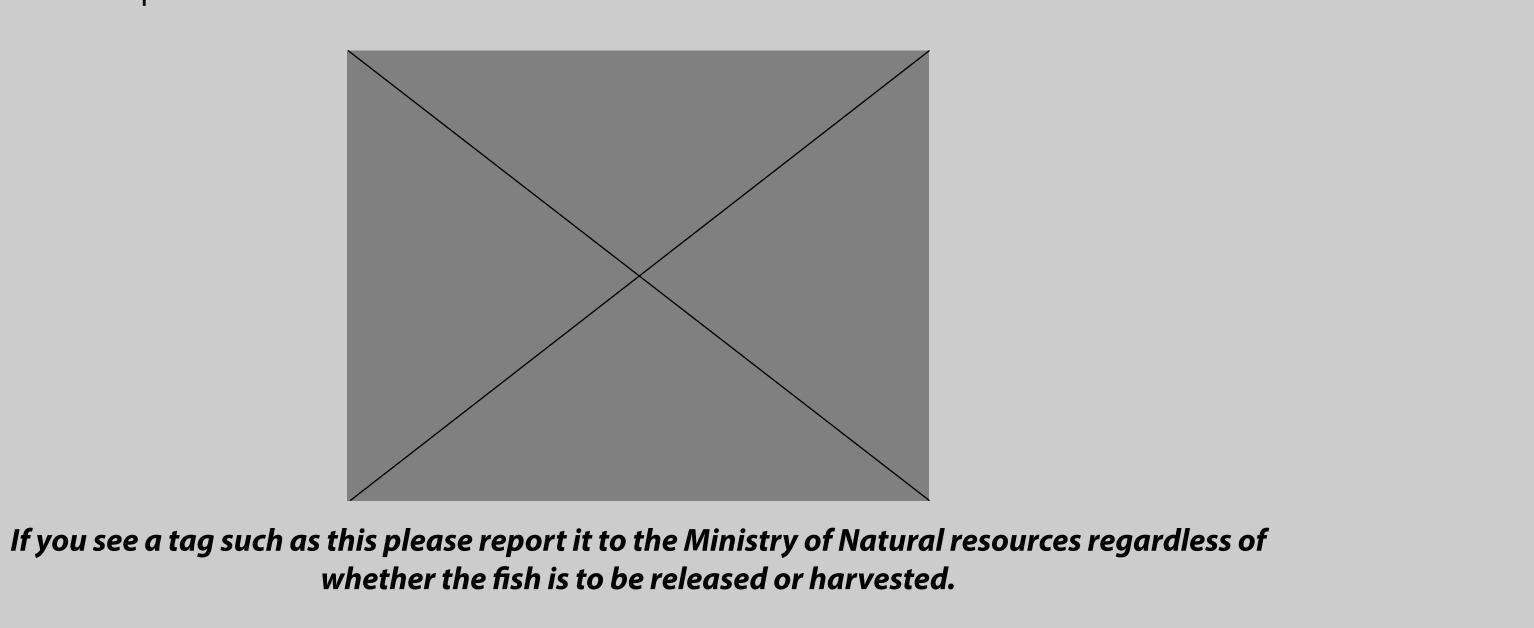

A scale sample is then carefully taken for possible DNA analysis.

Here is the tag sewn and ready to be trimmed.
